## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of Group I, claims 1-58 filed on November 3<sup>rd</sup>, 2004 is acknowledged. However, an error on the part of the Examiner was discovered with regard to the grouping of claims. Thus, a new restriction is set forth herein below. The Examiner apologizes for any undue burden this error may have caused Applicant.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-48 drawn to an apparatus for forming an absorbent core composite classified in class 425, subclass various.
- II. Claims 49-58 drawn to a method for forming an absorbent core composite classified in class 264, subclass various.
- III. Claims 59-62 drawn to an absorbent garment, classified in class 604, subclass 317+.

3. The inventions are distinct, each from the other because:

Inventions of Group II and III are related as process for making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In this case, the particulate matter can be distributed on the fibrous material by sprinkled hand or powder coated.

Inventions of Group I and III are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the

Art Unit: 1771

apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, the absorbent core of the absorbent garment can be made by powder coating or sprinkling the particulate matter on the fibrous material and further laminating said fibrous material to self-sustaining top and back sheets.

Inventions of Group II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the particulate matter can be distributed on the fibrous material by sprinkled hand or powder coated.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Jonathon Link on August 8<sup>th</sup>, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1771

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Applicant is advised that the reply to this requirement to complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lynda M Salvatore whose telephone number is 571-272-1482.

The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris can be reached on 571-272-1482. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
